- Strong and Hygienic for the stainless steel make
- Maneuverable anywhere as no need of other power than human’s
- Unbeatable pumping up power of 15m high

Stainless Steel make

DRAGON HDS

## FEATURES

### 15 Meter Pump-up

Compact and light-weighted Hand Pump “DORAGON” pumps up water to 15-meter high from ground level or suck up from 8-meter deep well.

### Stainless & Hygienic

Perfect rusty-water proof thanks to stainless steel materials used for main parts

### High Security

Tightly-shut structure of the upper part appearing on the ground will prevent anything from entering into the pump.

### Adaptable to small dia. pipe

25mm diameter for sucking side and 20mm for drainage. So, Hand Pump “DRAGON” is good for small size of well, too.

### Simple & Rigid

Simple structure will give very few mechanical trouble and no worry for using even at remote places.

### Easy Maintenance

For replacing the consumable parts like piston valve, you can do it easily just pulling up rod shaft. No need of big job like dismantling cylinder of pumping-up pipe.
